DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, and 6-11 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach or suggest an printing apparatus comprising a buffer storing print data to be used in a printing operation for one scan, counting means for counting at least part of the print data, stored in said buffer, which causes the printhead to perform a printing operation during acceleration of the carriage, comparison means for comparing a counted value, counted by said counting means, with a predetermined threshold, control means for controlling to change a number of printing elements of the printhead to be used in a printing operation for one scan of the carriage, based on a comparison result of said comparison means, a DC motor for driving the carriage, a power source of supplying electric power to the printing apparatus, and determination means for determining whether or not the power source is an AC power source or a battery source, wherein the number of printing elements of the printhead to be used in a printing operation for one scan of the carriage, which is controlled by said control means, satisfies a condition such that a sum of a driving current required for driving the number of printing elements and a driving current supplied to the DC motor for accelerating the carriage is equal to or lower than a capacity of the power source, and wherein a case in which it is determined by said determination means that the power source has a battery power source, controlling is performed by said control means, and in a case in which it is determined by said determination means that the power source is

an AC power source, the counting by said counting means, the comparing by said comparison means, and the controlling by said control means are skipped. The amendments made to the claims after the interview dated 11/15/06 set this invention apart from prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura E. Martin whose telephone number is (571) 272-2160. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.
